

## ***PRESS RELEASE***

*From: Grady Wheeler, Public Information Coordinator, City of Milwaukie (503) 786-7503  
Date: April 5, 2006*

### **New traffic signal activation on McLoughlin Blvd.**

The new traffic signal installed at Washington Street as part of the McLoughlin Boulevard Improvement Project is scheduled for activation on Thursday, April 6<sup>th</sup>, 2006 at 9 p.m.

Soon after this signal is activated, the signal at Jefferson Street will be deactivated and preparations will begin for the construction of the portions of raised median that will run down the centerline of the majority of the project.

This means motorists of the downtown area wishing to travel south on McLoughlin Boulevard will only be able to use the Harrison Street and Washington Street signalized intersections.

The new signal at Monroe Street is scheduled for activation in mid-April. The City will send out notification as the schedule becomes clear.
